

Table of Songs and What They Teach

The seven songs on the CD head the chart below, in order of appearance. On the left-hand column descending are all of the grammatical structures and verb tenses in the songs that are also taught in exercises accompanying the song. The page number where those exercises begin is given in the corresponding box. Note that some grammar points are demonstrated in more than one song, so the same exercise may be indicated more than once. In a few instances the exercise that supports one of the grammar points in a song may be found in the section accompanying another song, since both songs emphasize that point. Generally, exercises related to the song immediately follow each song in the text.
